About the Presentation: In this presentation, Dr Luo will introduce a case study of fire safety and risk assessment for a long tunnel. This case shows how engineers consider the safety, the risk, and the operation of a long tunnel at the design stage.

This is an SFPE CPD Event: One-hour CPD certificate will be provided to each attendee. PolyU is the first and so far, only Student Chapter in Greater China of one of the largest community of fire protection engineering, SFPE (Society of Fire Protection Engineering).
